

BUILDING ACTIVITY IN EASTERN CONNECTICUT

BUILDING AND BUSINESS.

Permits Show a Falling Off But the Value of the Structures to Be Erected is Greater.

Sales of real estate for the past week as shown by the number of warranty deeds filed in the various cities of the state reported by the Commercial Record numbered 435, as compared with 346 a year ago. Mortgage loans, owing to two large mortgages filed in New Haven and New London last year show a decrease when compared with 1915. For the past week mortgage loans amounted to \$1,420,000, while last year the grand total of \$3,657,013 was reached.

Ten new companies having a total authorized capital stock of \$102,945 were formed during the past week, while in the first week of July a year ago six companies with a total capitalization of \$251,000 were organized in the state.

The three bankruptcy petitions for the week have assets of \$4,131 and liabilities of \$13,545, which compares with three petitions having total assets of \$50,581 and liabilities of \$190,341 in the corresponding week of last year.

During the past week building permits have been issued in the cities of New Haven, Hartford, Bridgeport, Waterbury and Stamford to the amount of \$5 comparing with 123 a year ago. Building construction in the same cities amounted to \$302,508 as compared with \$249,322 last year.

Factory construction formed a goodly percentage of the contracts awarded during the week, and included buildings in Hartford, Waterbury and New Milford. A number of fine residences have also been contracted for in New Haven, Hartford and Ansonia, including a bank building in Greenwich, and one, two, three, four, six and twelve-family houses in Bridgeport, Hartford, Shelton and West Hartford.

Among the new projects for which plans are reported are garages in New Haven, Bridgeport and Ansonia, charitable institutions and a new factory building in Bridgeport and New Britain and six-family houses in Stamford.

Norwich had seven sales of real estate during the past week to one a year ago, and mortgage loans for the respective weeks of \$12,200 and \$13,150.

In New London there were six sales last week and the same number last year. The loans totaled \$21,250 last week and \$13,123 a year ago.

THIS WILL STOP YOUR HAIR FROM FALLING

It was Dr. Sangerbund who first discovered that dandruff and falling hair were caused by the same thing.

And now that Parisian Sage, the wonderfully delightful preparation that kills the dandruff germs can be secured at all drug and toilet counters, the clean people of this country have awakened to the fact that dandruff is unnecessary, that falling hair and itching scalp can be quickly stopped, and that anyone who frequently uses Parisian Sage should never grow bald.

To every man and woman who is afflicted with dandruff, stop falling hair, and have an immaculate scalp free from itching, we strongly recommend Parisian Sage.

Parisian Sage is sold for not more than 50 cents a large bottle. It is an ideal, gently perfumed liquid, free from grease and sticking, and will cause hair to grow lustrous and luxuriant. Lee & Osmond always has a large supply and guarantees it to you.

PLUMBING AND GAS FITTING

NEW RESIDENCE FOR LAUREL HILL

Charles E. Potter Will Erect a Dutch Colonial House—Julian L. Williams to Build Two Houses—Cesar Del Carlo Has Cellar Staked Out for Tenement House.

Charles E. Potter is having drawn for Dutch Colonial house which will be built on Laurel Hill avenue. The house will be one and half stories in height, 30 feet by 40 feet, and there will be seven rooms. The exterior will be shingled with 24 inch shingles and a sleeping porch will be erected in the rear. The interior will be finished off in enamel with oak floors downstairs. The bath room floor will be tiled. Electric lights, steam heat and other up to date improvements will be installed. Architects Cudworth and Thompson are drawing the plans.

Contract Awarded to C. M. Williams. The contract for the erection of a shed for the Edward Chappell and Co. has been let to contractor C. M. Williams. Architects Cudworth and Thompson drew the plans.

Plumbing. The plumbing and heating plans for the Murphy Block which will be erected at the corner of West Main and Elmwood streets will be out in a few days. Architects Cudworth and Thompson are working on the plans. Peck, McWilliams and Co., who have the contract for the erection of the building have cleaned out all the old building and are ready to start work on the foundation.

House Staked Out For Cesar Del Carlo.

Cesar Del Carlo has staked out the cellar for the erection of a two story modern tenement house on Washington street. The house will be 25 feet by 35 feet and will have a basement for both tenants. The house will be constructed of wood material and the interior will be finished off in hard wood. The house will have steam heat and all other modern improvements.

The second of the houses which Mr. Del Carlo is erecting on Elmwood avenue, is ready for plaster, while the other is fast nearing the completion stage. It will be finished soon after the remaining plumbing and other small jobs to be done.

Plans Nearly Complete. Architects Cudworth and Thompson will have the plans out in a week for the residence which George Adams will erect at the head of Lucas and Williams streets.

Plans for Putnam Building. By the first of the week plans will be out for the business block which J. J. McGarry of Putnam will have.

One of the houses will face on Washington street and the other on Lafayette. Both houses will be two stories in height. The first one will be 27 feet by 35 feet and will have six rooms, the other will be 34 feet by 51 feet with nine rooms.

The exterior of the houses will be shingled and both houses will have spacious verandas. The interior will be finished off in hard wood. Electric light and steam heat will be installed.

built in Putnam. The local architects Cudworth and Thompson are drawing the plans.

Foundation Work Completed. The foundation work for the house which Mrs. J. W. Burke is erecting on Elmwood avenue is practically all complete and the wood work will be started as soon as possible.

Work Advancing On Main Street Building. The work on the Norwich Chamber of Commerce building on Main street which Messrs. Sullivan and Hargreaves are having built is advancing as fast as can be expected. The men are working on the second story now and many of the window frames on that floor have been set up.

Contract for Storehouse Awarded. John Paracenti was awarded the contract for the erection of a storehouse for the American Waste and Metal Co., in the rear of their present building on West Main street. Architects Cudworth and Thompson drew the plans for the building which will be a single story.

Erected Second Story Concrete Forms. The concrete forms for the second story on the Putnam school are being erected which C. M. Williams is building, are being erected and work on the pouring of concrete for this floor will be commenced the first of next week. Contractor C. M. Williams is doing the work.

Carpentry Work All Finished. The carpentry work on all the Norwich Housing Co. houses which C. M. Williams has been erecting are all complete and while some of the plumbing to be looked after.

J. L. Williams to Erect Two Houses. Plans are being drawn for the erection of two houses for Julian L. Williams on the property he recently purchased near Backus hospital corner.

One of the houses will face on Washington street and the other on Lafayette. Both houses will be two stories in height. The first one will be 27 feet by 35 feet and will have six rooms, the other will be 34 feet by 51 feet with nine rooms.

The exterior of the houses will be shingled and both houses will have spacious verandas. The interior will be finished off in hard wood. Electric light and steam heat will be installed.

SOUTH MANCHESTER.

H. T. Reynolds will start work at once on the erection of a two-family frame house on Eldridge street for Cheney Brothers. The work will be completed by the end of the month.

contract has been let for the brick work in connection with the new Swedish Lutheran church to be erected on Church street. The foundation was completed last fall.

Four lots at Ocean Beach have been purchased of Senator Brandegee by S. Patterson. They are located on Bendy avenue, and the new owner proposes to erect houses thereon.

Work has been started on a house on Nameless avenue for John H. Henshaw. It will be a frame structure fitted with all the conveniences.

Cold beef, stuffed baked potatoes, steamed cabbage, drawn butter sauce, apple and date salad.

MELON LICE.

Full Directions for Fighting Pest—Bent Shank Nozzle Needed.

Several reports that lice are very plentiful on their melon vines. The following is taken from bulletin 174 of the Illinois experiment station:

"This experiment station has had experience in combating melon lice for the past 12 years. A number of the growers have been successful in obtaining for the control of this insect have been used, but none of them has given as satisfactory results as a commercial preparation known as 'Black Leaf 40,' which has been thoroughly tested for three seasons.

The material will not injure the melon foliage when used as strong as one part to 250 of water. One part to 500 or 600 of water is to all appearances as effective, and may be used when particularly quick results are desired. One part to 1000 of water will prove practically as effective, and throws a finer mist than the stronger.

In the tests from which these conclusions are drawn, a barrel pump, equipped with lead hose, hand pump, and bent shank nozzle, was used for making the applications. Any outfit capable of throwing a fine spray with reasonable force may be used with equal success.

"The type of nozzle used is an important matter in treating melon lice. The nozzle must be of the bent shank type, and it should have a fine cap in order that the material may be thrown in a fine mist.

"It will be found easiest to apply the spray to melon and cucumber vines that have been growing. This operation consists simply in turning the nozzle in the direction of the rows, and as described in a previous publication of this station.

"In applying the spray, high pressure should be used and the nozzle should be kept moving. With due care in handling the nozzle, it is possible to reach the undersurfaces of the leaves of the plants.

"The 'Black Leaf 40' solution is apparently so destructive to the lice that the finest mist, coming in contact with their bodies, is capable of killing them.

"It will be found easiest to apply the spray to melon and cucumber vines that have been growing. This operation consists simply in turning the nozzle in the direction of the rows, and as described in a previous publication of this station.
